

## Resolution: An Immersive Polyphonic Spree Album Experience

This film is set to The Polyphonic Spree's powerful album *Salvage Enterprise*.

### **(Section 44) Galloping Seas**

In the sorrow of the times  
Evacuation causes light to breathe  
Resting thoughts provide the food we need  
Plow the fields, we've got some truth to seek  
Swinging ladders on the ship  
Counting millions on the cliffs  
Decide if calculations make the news exist  
Find the wind, stretch the linens quick

Hold on through the galloping seas  
Hold your head high in the storm  
What you've lost it seems you left before  
Hold on through the galloping seas  
They'll come around, they'll come around  
Hold your head high in the storm  
What you've lost it seems you left before  
Shyness rides the wind

Through the sea the screams fall upon the ocean floor  
The waves collide with the fears  
We survived  
The sun makes it clear again that we know  
On our own we can be ready again

Hold yourself above the storm  
Keep the faith you're getting warm again  
You're on your way  
Hold yourself above the storm  
Keep the faith you're getting warm each day  
You're on your way

Hold yourself above the storm  
Keep the faith you're getting warm again

#### **(Section 45) Wishful, Brave, and True**

Trust a need for finding wishful ways of truth  
Soft familiar lines familiar waves  
Cypress in the skyline weaving through the blue  
Something to confuse your bitter ways

Gotta believe your will is strong  
You're weaker when you're building a wall  
Gotta believe in standing tall  
The wind is there to break your fall  
Gotta believe so much inside  
The whispers come around once again

Laughter is disguising the richest rain we knew  
Lost a million times a million ways  
Cast your doubts aside when reaching for the new  
It cost a million tries to make you whole

Gotta believe your will is strong  
You're weaker when you're building a wall  
Gotta believe in standing tall  
The wind is there after all  
Gotta believe so much inside  
The whispers come around to start again on life

Life is all around the world  
Entirely in strength  
We're all around the world  
In finding our needs  
Are all around the world  
So we can believe  
That all around the world  
That life has a line

### **(Section 46) Give Me Everything**

Love plays  
Somehow the game changed  
Into amusing  
You not me

Give me hope  
Somehow, it's gone away  
I'm rolling back years  
I can't replace

Give me love that I need  
Something new to receive  
Give me fantasy so I can move around  
Give me faith with some light  
On a Lord I can find  
Give me everything I need to survive

'Cause it's painful and it's dangerous  
For me

So I'm open  
Bare-footed and coasting  
Borderline floating  
On the sweetest breeze

Waving and smiling  
Humming and shaken  
Think I am glowing  
'Cause it's blue outside

I need dreams I can find  
Give me love to invite  
Give me everything that moves with the light

Give me food for my blood  
Give me something to love  
Give me wonderful so I can shine

'Cause there's one thing I cannot hide  
That's losing inside  
'Cause there's one thing I cannot hide  
That's losing inside

#### **(Section 47) Got Down to the Soul**

Wake up silly beast of mine  
Give yourself relief  
Nothing you can find  
Got down to the soul

Racing to begin  
Fulfilling all the needs  
Blinded by the sins  
And lovin' what ya preach  
Reading all the words  
And finding all the lies  
Thinking all the time  
You got down to the soul

Some of us will win  
And some of us will scream  
Some of us will die  
And some of us will sing

Fearless feeling cheers all through the night  
Breaking the spell  
Feeling the light inside

Fearless feeling cheers all through the night  
Breaking the spell  
Feeling the light inside

Well, find your future by design  
Keep the world standing by your side  
Find your future by the light  
Keep the world standing by your side

Cuz it got down to the soul

Wake up silly beast of mine  
Give yourself relief  
Nothing you can find  
Got down to the soul  
Some of us will win  
And some of us will scream  
Some of us will die  
And some of us will sing [x2]

(Section 48) Shadows on the Hillside

Blast all those demons, vitamins carry me, please  
While my heart silently screams  
Fade all those past lives, think yourself a renegade, just leave  
Cause thoughts only flow when the windows are wide

Save all the sadness, take yourself out to sea, please  
While the stars politely relieve  
Ya gave up the last time, try your best to pry away, just be  
Cause thoughts only flow when the windows are wide  
Reach out and fall far away  
Finally wish you can fly  
And dream

Dream, shadows on the hillside  
What ya found were the wings to go  
You've just set yourself free  
Shadows on the hillside  
What ya see is miles high  
What ya have is what ya need

What ya need

Cause thoughts only know when the windows are wide  
Reach out and fall far away  
Finally wish you can fly and dream

Dream, dream, dream, dream

Shadows on the hillside  
What ya found were the wings to go  
You've just set yourself free  
Shadows on the ground  
What ya lost can be found  
What ya have is what ya need  
What ya need, what ya see  
What ya see on the ground  
On the ground

On the way, you can follow me  
On the ground  
On the way, you can follow me

You can feel you're finally soaring  
Reach away and say you follow me  
Find your future always waiting  
Reach away and say you follow me

#### **(Section 49) Hop off the Fence**

Hop off the fence, nothing to say  
Laughing at the time, throw it all away  
Set your new sights, picture the way  
Something new to find, throw it all away

Love the future that you can find  
It's ok, it's alright (to sway)  
Love the future that you can find  
It's ok, it's alright (to sway)

Love the future that you can find  
It's ok, it's alright, decide

Love life, it feels way out  
You'll always decide [x2]

### **(Section 50) Open the Shores**

Hop off the fence, nothing to say  
Laughing at the time, throw it all away  
Set your new sights, picture the way  
Something new to find, throw it all away

Love the future that you can find  
It's ok, it's alright (to sway)  
Love the future that you can find  
It's ok, it's alright (to sway)  
Love the future that you can find  
It's ok, it's alright, decide

Love life, it feels way out  
You'll always decide [x2]

We all fall down  
Nothing can compare to the strength of knowing  
We all fall down  
Nothing can compare to the strength of knowing  
You will breathe  
In the moment  
When ya find out  
You were always a part of the sea

If life is an oar  
Rowing the seas  
Open the shores  
To renew the dream [x4]

### **(Section 51) Winds of Summer**

One calls the other  
Down comes mother  
The winds of the summer  
Makes us feel alive

Hey  
So long  
It makes no difference  
You had it all along [x2]

With the move of the sun  
Feels like summer

Hey  
So long  
It makes no difference  
You had it all along

With the move of the sun  
Feels like summer  
When the people fly around  
Makes ya wonder  
It's a cool flash of sound  
That I'm under

One calls the other  
Down comes mother  
The winds of the summer  
Makes us feel alive

### **(Section 52) Morning Sun, I Built the Stairs**

In the morning sun I am awakened  
From all of the fire that's born in the sky  
In the morning sun, my dreams are savin'  
The moments that found a part of my life

So alive

So am I

In the morning sun

The trees are singing

Humming their sound and talking to clouds

In the morning sun

We hang on the seasons

Lift off is the final step to goodbye

So alive

So am I

So alive

Yesterday finally moved me

I built the stairs

Tomorrow makes a thousand new reasons

I wanna share

Up and down back and forth feelings

Gives me a ride

Smiling at the goddess of evil, I learned to fly

I learned to fly

The more that I become a new reason, I wanna try

Yesterday finally moved me

I built the stairs

Tomorrow gives a thousand new reasons

I wanna share

Up and down back and forth feelings

Gives me a ride

Smiling at the goddess of evil, I learned to try
